

Public Awareness Campaign Input Forum

As part of a regional response to homelessness, we are preparing to launch a public awareness campaign. This campaign will serve to educate the community and dispel myths on homelessness.

Please drop-in and give your input on:

What are the most important messages that need to be communicated?

What are the most effective ways to deliver these messages to the community?

Please take this opportunity to share your ideas to contribute to the planning of the campaign.

Help us think outside the box

and we will provide some food for thought!
